abdullah-yaseen.vercel.app • linkedin.com/in/abdullah-yaseen1 • github.com/AbdullahYaseen01

Full-Stack Developer and AI/Python Engineer who builds and ships production-grade SaaS products from idea to deployment. Experienced across React, Next.js, Node.js, Python, and SQL/NoSQL databases, with a strong focus on AI automation, REST API design, and performance-optimized web applications. Founder and builder of two launched SaaS platforms (Clipzy and RaahBaan), combining full-stack engineering with AI/LLM integrations to deliver measurable value to real users. Proven freelance track record of 30+ delivered projects with consistent 5-star ratings.

CORE TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), HTML, CSS, Tailwind

Backend: Node.js, Express.js, Python, FastAPI, REST API Design

Databases: PostgreSQL, Supabase, MongoDB, SQL Server

AI / ML: AI / LLM Integrations, Machine Learning, Computer Vision, NLP, Chatbots, Automation

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Vercel, Linux

APIs & Integrations: REST APIs, Webhooks, JSON, AI APIs

Tools: Git, GitHub, VS Code, Postman

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Autozy (Remote, USA)

2025 – 2026

- Built and maintained scalable full-stack applications with Next.js, Node.js, and PostgreSQL, powering reliable day-to-day operations of the Autozy automotive platform.
- Developed and integrated REST APIs and performance-optimized React front-end components, improving application speed and user experience.
- Partnered with cross-functional teams to ship production-ready features, strengthening system reliability and streamlining deployment workflows.

Python Backend Engineer — Nyuton Enterprises

2024 – 2025

- Engineered scalable Python backend systems to support core business operations and growing application demand.
- Built and optimized REST APIs, improving server-side performance and reducing response latency.

Freelance Full-Stack Developer & AI Automation Specialist

2020 – 2023

- Delivered 30+ international client projects on Fiverr (Level Two Seller) and Upwork, consistently earning 5-star ratings for quality and reliability.
- Built responsive, production-grade web applications with HTML, CSS, JavaScript, and React for clients across multiple industries.
- Designed and deployed AI chatbots and lead-generation automation workflows, streamlining client processes and improving operational efficiency.

FEATURED SAAS PRODUCTS

Clipzy — AI-Powered Live Streaming & Content Studio

clipzy.xynovix.com | Next.js, React, Node.js, AI APIs, Automation

- Built a SaaS platform for recording live streams and podcasts with multi-guest support, enabling creators to produce studio-quality content directly in the browser.
- Engineered an automated post-production pipeline that edits recorded content and auto-generates thumbnails, descriptions, and tags using AI.
- Integrated one-click multi-platform publishing so users can distribute finished content to social media without leaving the app.

RaahBaan — AI Education & Career Guidance Platform

raahban.com | *Next.js, React, Node.js, Supabase, AI / LLM Integrations*

- Designed and launched a Pakistan-focused ed-tech SaaS that guides students through admissions and career decisions end to end.
- Built an integrated toolset spanning merit calculator, scholarship and university explorer, study planner, past papers, mock tests, career-path simulator, and field-switching guidance.
- Implemented AI counselor and AI tutor features to deliver personalized, on-demand student support at scale.

SELECTED PROJECTS

- **FamLink** — Family care web platform connecting families with caregivers through a clean, responsive interface. famlink.care
- **3D Web Experience** — Interactive 3D web application with real-time in-browser rendering and modern UI. core-seven-henna.vercel.app
- **Stepping Stone** — Responsive, multi-section business website with a clean modern UI. steppingstone.netlify.app
- **Construction Company** — Responsive marketing website showcasing a construction firm's services and projects. constructioncompany.netlify.app
- **Luxury Watch Store** — Modern e-commerce storefront. Next.js, React. watchs-gray.vercel.app
- **Healthy Start NC** — Healthcare & wellness web platform. WordPress, PHP. healthystartnc.com

Computer Vision & ML Systems

Python-based real-time computer-vision systems for object detection, tracking, counting, and recognition.

- **Automatic Product Scanning & Billing System** — Vision-based checkout that detects products in real time and auto-generates itemized bills.
- **Real-Time Multi-Person Tracking System** — Tracks and re-identifies multiple people across video frames for crowd and movement analysis.
- **Automatic Vehicle Counting System** — Detects and counts vehicles from live traffic feeds for flow monitoring and analytics.
- **Real-Time People Detection** — Detects and localizes people in live video streams for occupancy and safety use cases.
- **Real-Time License Plate Recognition (ALPR)** — Detects vehicle plates and extracts plate text in real time for access control and enforcement.

EDUCATION

Bachelor of Computer Engineering — COMSATS University, Lahore

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Computer Networks, Artificial Intelligence, Software Engineering.

CERTIFICATIONS & ADDITIONAL STRENGTHS

Certifications: AWS Essentials (Udemy), Python Machine Learning (Udemy), Python Automation (Coursera), Introduction to GitHub (Coursera)

Creative & Marketing: Graphic Design, Video Editing, Social Media Management, Facebook Ads, Instagram Ads, SEO

Strengths: Problem-Solving, Critical Thinking, Communication, Fast Learner, Adaptability, Research, Attention to Detail

Languages: English, Urdu

Open To: Remote Full-Stack, AI, Python Automation, and SaaS Engineering roles
